EDUCATION

Computer Engineering	2014 – 2019
Ain Shams University	Very Good Degree with Honors
	Accumulative ratio: 83.44%

EXPERIENCE

Mentor Graphics	- Developed a **smart post-run script** *that automates analyzing grid runs, resubmits inconsistent failures and reports real failures.*
Long-term internship	- **Clustered** *more than 1000 test cases*
12 months	- **Standardized** *test cases suite using semi automation (Perl scripting + manual inspection).*
Quality assurance	
TDC - Ain Shams	- *Designing and Building TDC Online Course-Booking System using Laravel and MYSQL.*
3-month internship	

PROJECTS

Smart exam cloud using machine learning, PHP framework Laravel, MongoDB and REST APIs	*(Video) <Code>*
Asphalt "Get your car fines with just a photo" using android java, PHP REST API, openCV in python and web scraping by Perl	*(Video) <Code>*
Tiny scanner and parser using python and tkinter	*(Video) <Code>*
Photos Morphological operations using openCV	*<Jupyter Notebook>*
Instagram filters using python openCV library	*<Code>*
Security DES Encrypt and Decrypt algorithm using Perl	*<Code>*
Security classical encryption algorithms	*<Code>*
Github analysis by Shell Scripting	*(Video) <Code>*
Admin panel for ASU using PHP Laravel Asgard CMS	*<Code>*
Social network using Laravel (3 member team)	*<Code>*
Memory allocation simulator using c#	*<Code>*
Processes scheduler simulator using c#	*<Code>*
Matrix library in c/c++ (8-member team)	*<Code>*
Reporting system using PHP native and MYSQL	*<Code>*
MIPS Assembler using python and Tkinter for GUI	*(video) <Code>*
MIPS pipelined processor using Verilog (5-member team)	
Smart car project with functional sensors using Arduino	
Examination system using C++	

	COURSES
Advanced Wordpress including plugins and themes from Udemy	
Shell & Perl Scripting through internship in Mentor Graphics	
1 million Arab coders Full stack track from Udacity (Certificate) *-Linux -python -git & github*	
Laravel PHP framework from YouTube	
C# from YouTube	
Data Structure from Coursera (Certificate)	
Algorithmic Toolbox from Coursera (Certificate)	
JS, JQUERY and Ajax from Udemy	
HTML, CSS, PHP & MYSQL from YouTube	

	VOLUNTEERING
Associative Power Engineering Community (APEC) Volunteering *- IT member - IT back end Team Leader*	
Athar– أثر (Volunteering) *- Created simple website for them*	

			SKILLS
C++ *PHP* *C#* *Laravel*	*JS* *Scripting* *Quality Control* *Wordpress*	*SQL* *TCL* *Perl* *Shell*
